

## St Patricks College, Bundaberg

### Project

New school buildings

### Client

Catholic Diocese

### Completion Date

August 2010

### Project Details

This project involved numerous progressively completed stages, each being finished and handed over to allow the school to function around the construction phase.

The work included a new two storey classroom building, a Prep building, alterations to existing buildings and an extension to the multi-purpose centre with an outdoor stage area. The walkways between various buildings were also upgraded.

Typically, WCQ were mindful of safety concerns and worked around a strict set of procedures agreed to with the school to allow the controlled flow of students between buildings and school playground areas.

The project is testimony to WCQ's flexibility when dealing with clients and its mindfulness of safety concerns when in education environments.
