

## St Josephs College, Childers

### Project

New school buildings

### Client

Catholic Diocese

### Completion Date

January 2010

### Project Details

This project involved the construction of a multi-purpose classroom block. The building site was tight, necessitating working up to the footpath and adding to the usual complications of school related construction.

In addition an existing playground area was demolished and a new covered play area between the new and old buildings was constructed.

WCQ staff were mindful of safety concerns and worked around a strict set of procedures agreed to with the school to allow the controlled flow of students between buildings and school playground areas.

WCQ's list of educational projects is extensive and underscores our reputation in the field.
